

Georgia Metals Companies Warranty Information

Dear Valued Customer,

Thank you for choosing Georgia Metals Companies for your roofing project.

We are committed to providing roofing products you can trust. We source steel and painted roofing materials from industry-leading suppliers and carefully manufacture each panel to meet our quality standards. Our goal is to deliver products that provide long-term performance and value, giving you confidence in the roof protecting your home, business, or agricultural building.

In addition to the quality and craftsmanship that go into every order, many of our painted roofing products include warranties provided directly by the steel coating manufacturers. Because the steel is pre-coated before it is received by Georgia Metals, these warranties are issued by the coating manufacturer and passed through to you, the end customer.

To ensure a smooth warranty claim process, we recommend retaining the following information for the life of your roof:

- Original sales invoice
- Date of purchase
- Coil number(s) associated with the material used on your project

We have a document to capture these items for our customers and yours, allowing ease of documentation. These items are required by the coating manufacturer to validate and process a warranty claim. Without this information, warranty coverage may be delayed or denied by the manufacturer.

Should you ever have questions regarding warranty coverage or need assistance gathering documentation, our team will be happy to help guide you through the manufacturer's claim process.

Thank you for placing your trust in Georgia Metals Companies. We appreciate the opportunity to supply the materials for your project and look forward to serving you for years to come.

Sincerely,

Mark Grigg

President-Georgia Metals
